GoldenGlow Website — Acceptance Test Plan

Version	1.0
Date	9 November 2026
Site under test	https://goldenglowqr.com (production)
Roles	Worker · Employer · Admin
Tester	_____
Prepared by	GoldenGlow

---

1. Purpose

This plan lets an independent tester verify the GoldenGlow website end to end using **only the website** — no server, database or Supabase access is required.

You will test three roles:

1. **Worker** — create a profile, save jobs, apply with a CV, track applications.
2. **Employer** — manage a company profile, post and edit jobs, review applications.
3. **Admin** — review accounts and jobs, approve/reject postings, manage applications, enquiries and saved searches.

Every test case has an ID, steps, the expected result and a result box. Record **Pass / Fail / Blocked** and attach a screenshot or short recording for every failure.

> **Important:** This is the live production site. Only create data prefixed with `QA-` and only delete records you created yourself. Never upload a real passport, Iqama, CV or any real personal document. Use a dummy PDF for CV tests.

---

2. Accounts and access

All three roles sign in through the same page: **https://goldenglowqr.com/login** There is no separate admin URL or admin password. The admin account is a normal account whose profile has been given the admin role by GoldenGlow.

2.1 Credentials

GoldenGlow will fill in the admin row before hand-off. For worker and employer you can either use accounts supplied by GoldenGlow or register your own (see 2.2).

Role	Email	Password	Notes
Worker	_____	_____	Supplied, or self-register
Employer	_____	_____	Supplied, or self-register
Admin	_____	_____	Supplied separately by GoldenGlow

> The admin account is for admin tests only. Do not use it for the worker or employer cases — use separate worker and employer accounts, otherwise their dashboards will not contain the test data you expect.

Never share these credentials or change the admin password.

2.2 Registering your own worker / employer accounts

If GoldenGlow only supplied the admin account:

1. Use your own email with a plus-address, for example:
   - `yourname+gg-worker@gmail.com`
   - `yourname+gg-employer@gmail.com`
2. Go to **/signup** and pick **Worker** or **Employer**.
3. Fill in the form and submit.
4. If a “Check your inbox” screen appears, open the confirmation email (sender `info@goldenglowqr.com`) and click the link. Check spam if it is not there within a few minutes.
5. Sign in at **/login**.

Confirmation emails are rate-limited. Do not re-submit more than two or three times; if you see “Too many attempts”, wait and use an account that is already confirmed.

2.3 Using three roles at once

Use **three different browsers or three separate browser profiles**, for example Chrome, Edge and Firefox. Multiple incognito windows in the same browser can share a session.

Window	Signed in as
Window 1	Worker
Window 2	Employer
Window 3	Admin

---

3. Before you start

- [ ] Use a current version of Chrome, Edge, Firefox or Safari.
- [ ] Set up the three windows described in 2.3.
- [ ] Have a **dummy PDF** ready (under 5 MB) to use as a CV. It must not contain real personal data.
- [ ] Use test data only, for example `QA – Electrician`, `QA – Test Employer Ltd`, `qa-worker@…`, `qa-employer@…`.
- [ ] Allow pop-ups for `goldenglowqr.com` (the admin CV link opens in a new tab).
- [ ] Optional: open the browser developer console (F12) so you can note any red errors.
- [ ] Take a screenshot for every failed or blocked test.
- [ ] Do not change or delete data you did not create.
- [ ] Do not use the site with real candidate or worker documents.

3.1 Site behaviour you should expect (not bugs)

- The vacancies currently on the site may include **demo data**, which shows a **"Sample listing"** badge. Jobs created by an employer become public only after an admin verifies them, and then show **"Verified"**. Your job counts may differ from the examples in this document.
- The jobs page shows **6 jobs initially**; **Load More** reveals the rest.
- Confirmation and contact emails are sent from `info@goldenglowqr.com`. They may take a minute and can land in spam on the first send.
- Status changes made by another role may require a **page reload** to appear instantly.
- A CV link in the admin panel is a **short-lived signed link**; if it expires, click the CV filename again.
- The contact form may say the enquiry was saved but email delivery is not switched on. Record it as an observation; the enquiry should still appear in the admin panel.

---

4. How to record results

For every case mark one of:

- **Pass** — behaves exactly as described.
- **Fail** — differs from the expected result. Attach a screenshot and note the browser.
- **Blocked** — cannot be completed (say why, e.g. no confirmation email received).

Use this bug format for every failure:

```
Bug ID:
Title:
Role:            Worker / Employer / Admin / Public
Page URL:
Browser / OS:
Steps to reproduce:
1.
2.
3.
Expected result:
Actual result:
Severity:        Critical / High / Medium / Low
Evidence:        screenshot / recording / console error
Was this data created by you?   Yes / No
```

Severity guide:

- **Critical** — cannot sign in, cannot apply, data lost, another role's data visible.
- **High** — a main task fails (post job, verify job, open CV, update status).
- **Medium** — validation, copy, layout or persistence problem with a workaround.
- **Low** — cosmetic or minor wording issue.

---

5. Public website tests

PUB-01 — Homepage loads

1. Open https://goldenglowqr.com/
2. Scroll from top to bottom.

Expected: Hero slider, client logos, statistics, “Why GoldenGlow”, industries, about, employer services, jobs, process, countries, showcase, 3D globe and contact section all render. No blank sections or broken images.

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

PUB-02 — Top navigation

1. On the homepage, click **About**, **Industries**, **Countries**, **Quick Links** → **Contact Us**.
2. Use **Jobs**, **Team**, **Contact**.

Expected: Hash links scroll to the correct section and leave the header visible above it. Only one main menu item is highlighted at a time. Jobs/Team open their pages.

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

PUB-03 — Language switch

1. Click **العربية** in the top bar.
2. Reload the page.
3. Switch back to **English** and reload.

Expected: The whole page switches to Arabic and right-to-left layout; the choice survives a reload. English restores the left-to-right layout.

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

PUB-04 — Mobile menu

1. Narrow the browser to a phone width (around 390 px) or use device mode.
2. Open the hamburger menu.
3. Expand **Industries** and choose an industry.
4. Reopen the menu, tap **About** (or another section link).
5. Press Escape while the menu is open.

Expected: The drawer opens and closes cleanly; choosing a link closes it and navigates/scrolls. The page can be used without horizontal scrolling.

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

PUB-05 — Jobs list

1. Open **/jobs**.

Expected: The page shows a count such as "Showing 6 of 10 jobs found" (your count may differ). Any demo job has a **Sample listing** badge. The search box and five filters are visible.

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

PUB-06 — Search and filters

1. Search for `electrician`.
2. Clear the search.
3. Filter by Industry, then City, then Experience, then Employment type.
4. Combine two filters.
5. Click **Clear filters**.
6. Choose a filter that matches nothing.

Expected: Counts update correctly; the URL reflects the filters on /jobs; the empty state offers **Clear filters** and works.

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

PUB-07 — Salary filter and sort

1. Choose each salary band.
2. Sort by **Salary: high to low**.
3. Sort by **Newest**.

Expected: Results respect the selected band and order; no result is duplicated or missing unexpectedly.

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

PUB-08 — Load more

1. Open **/jobs** with no filters.
2. Click **Load More** until it disappears.

Expected: The list grows by 6 each time and eventually shows all 10 jobs. The button disappears when everything is shown.

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

PUB-09 — Job detail modal

1. Click **View Details** on a job.
2. Read the details.
3. Press Escape.

Expected: A modal shows title, company, city, industry, type, experience, salary, posted date, description and requirements. It closes on Escape, the close button and the backdrop.

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

PUB-10 — Signed-out job actions

1. In a signed-out window, click **Save** on a job.

2. Click **Apply Now** on a job.

Expected: Save works and shows a toast. Apply opens a sign-in prompt; after signing in as a worker you are returned to the jobs page.

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

PUB-11 — Licences

1. Open **/licences**.
2. Open a document.
3. Use **Open full size** (if present) and close it.

Expected: Five licence documents display; each opens in a modal and can be viewed full size. No image is missing or unreadable.

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

PUB-12 — Team and legal pages

1. Open **/team**.
2. Open `/legal/privacy`, `/legal/terms`, `/legal/cookies`.
3. Open an unknown URL such as `/this-page-does-not-exist`.

Expected: Team profiles render. All legal pages render with readable text. Unknown URLs show the 404 page with a working **Home** link.

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

PUB-13 — Footer, WhatsApp and map

1. Scroll to the footer.
2. Click a few footer links.
3. Click the WhatsApp button; close the popup if one appears.
4. On the homepage contact section, check the office details and map.

Expected: Footer links work. WhatsApp opens the chat link or shows the configured popup. Address, hours and map render; **Get directions** opens Google Maps.

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

PUB-14 — Contact form validation

1. On the homepage contact form, submit empty.
2. Submit an invalid email.
3. Enter a short message (under 20 characters).
4. Complete all required fields correctly and submit.

Expected: Each invalid attempt shows inline errors and does not send. The valid attempt shows a success message (or a clear "saved but email delivery not switched on" message) and clears the form.

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

PUB-15 — Job alert

1. On **/jobs**, enter your email under "Email me jobs like this".
2. Save the search.
3. Change a filter and save again.

Expected: A confirmation message appears; the form clears; saving again after changing filters is allowed.

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

---

6. Worker tests

> Sign in as the **worker** account in Window 1. If you self-registered, confirm the email first.

WRK-01 — Sign in and dashboard

1. Sign in at **/login**.
2. Observe the landing page and header.

Expected: You land on **/dashboard/worker**. The header shows **Dashboard** and **Sign Out**. The tabs are Dashboard, My profile, Saved jobs, Application status.

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

WRK-02 — Profile prefilled correctly

1. Open **My profile**.

Expected: Your full name and the **trade/job title** entered at sign-up are already filled in. (If the trade is empty, record a bug.)

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

WRK-03 — Profile edits persist

1. Change the trade, phone and “Skills & experience”.
2. Click **Save changes**.
3. Reload the page.

Expected: A “Saved” message appears and all edits are still present after reload.

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

WRK-04 — Save and remove a job

1. Open **/jobs**.
2. Click the bookmark on a job.
3. Open **Saved jobs** in the dashboard.
4. Click **Remove**.
5. Reload.

Expected: The saved job appears in the dashboard and survives a reload. **Remove** deletes it and it stays removed after reload.

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

WRK-05 — Apply to a job with a CV

1. On **/jobs**, open a job and click **Apply Now**.
2. Confirm name and email are prefilled.
3. Enter a phone number.
4. Attach your dummy PDF CV.
5. Add a cover note.
6. Submit.

Expected: "Application submitted" appears. No error toast about the CV. The application is listed under **Application status** with job title, company, city and **Submitted**.

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

WRK-06 — Duplicate application

1. Open the same job again.
2. Click **Apply Now**.

Expected: An **"Already applied"** dialog appears with a link to the worker dashboard; no second application is created.

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

WRK-07 — Invalid CV handling

1. Apply to a different job.
2. Try a file that is not PDF/DOC/DOCX, or a PDF larger than 5 MB.
3. Submit.

Expected: The application is still submitted, but a clear message says the CV could not be uploaded. Do not upload real documents for this test.

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

WRK-08 — Saved jobs from signed-out browsing

1. In the **same browser window/profile** you use for the worker, sign out.
2. Save two jobs while signed out.
3. Sign back in as the worker.
4. Open **Saved jobs**.

Expected: The jobs saved before signing in are merged into the account and appear in the list. (This works per browser profile, so do not switch browsers between steps.)

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

WRK-09 — Role isolation

1. While signed in as the worker, open **/dashboard/employer**.
2. Open **/admin**.

Expected: The employer dashboard redirects you to your worker dashboard. `/admin` shows a **"Not authorized"** screen and no admin data.

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

WRK-10 — Persistence after sign-out

1. Sign out.
2. Sign back in.
3. Check **Saved jobs** and **Application status**.

Expected: Saved jobs and applications are still there.

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

7. Employer tests

> Sign in as the **employer** account in Window 2. If you self-registered, confirm the email first.

EMP-01 — Sign in and dashboard

1. Sign in at **/login**.

Expected: You land on **/dashboard/employer**. Tabs are Dashboard, Post a job, My Jobs, Applications.

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

EMP-02 — Company profile persists

1. On **Dashboard**, edit company name, city, industry, website and about.
2. Click **Save changes**.
3. Reload.

Expected: The values are saved and remain after reload.

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

EMP-03 — Post-job validation

1. Open **Post a job**.
2. Submit empty.
3. Enter a one-character title and submit.
4. Enter a description shorter than 20 characters and submit.

Expected: Inline errors explain what is missing. Nothing is submitted until the form is valid.

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

EMP-04 — Post a job

1. Complete the form with a title such as `QA – Electrician 9 Nov`.
2. Choose industry, city, type and experience.
3. Enter a salary and a description of at least 20 characters.
4. Submit.

Expected: "Job submitted for review" appears. The job appears in **My Jobs** as **Pending review**.

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

EMP-05 — Pending jobs are not public

1. Open **/jobs** in any window.
2. Search for the job title.

Expected: The pending job is **not** visible publicly.

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

EMP-06 — Edit sends the job back to review

1. In **My Jobs**, click **Edit** on your QA job.
2. Change the title, for example `QA – Senior Electrician 9 Nov`.
3. Click **Update listing**.

Expected: The job remains **Pending review** (content edits require re-approval).

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

EMP-07 — Delete your own job

1. In **My Jobs**, click the trash icon on the **QA job only**.
2. Reload.

Expected: The QA job disappears. Do not delete any other job.

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

EMP-08 — Employer applications

> Complete the cross-role flow in section 9 first.

1. Open the **Applications** tab.
2. Click **Shortlist** on the QA application.

Expected: The worker's application is listed with name, email, job and city. **Shortlist** updates the status.

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

EMP-09 — Role isolation

1. While signed in as the employer, open **/dashboard/worker**.
2. Open **/admin**.

Expected: The worker dashboard redirects you to the employer dashboard. `/admin` is not available.

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

---

8. Admin tests

> Sign in as the **admin** account supplied by GoldenGlow in Window 3.

ADM-01 — Admin sign-in

1. Sign in at **/login**.

Expected: You land on **/admin**, not on the employer or worker dashboard. The admin menu shows Overview, Accounts, Applications, Jobs, Saved searches, Enquiries.

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

ADM-02 — Overview

1. Open **Overview**.

Expected: Tiles show Accounts, Workers, Employers, Applications, Jobs live (with pending count), Saved searches and Enquiries. Latest activity lists recent records.

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

ADM-03 — Accounts and CSV

1. Open **Accounts**.
2. Search for part of a known name or email.
3. Click **Export CSV**.

Expected: The list filters correctly. A file `goldenglow-accounts.csv` downloads and contains the visible accounts.

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

ADM-04 — Create a job as admin

1. Open **Jobs**.
2. Fill the **Post a job** form with a `QA - Admin Test Job` title and a valid description.
3. Submit.

Expected: The job is saved as **pending** and appears in the list. Demo jobs show a **Sample** pill; your new job does not.

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

ADM-05 — Verify, reject and delete a job

1. Click **Verify** on your QA admin job.
2. Open **/jobs** publicly and search for it.
3. Return to admin, click **Reject** on the same QA job.
4. Check the public jobs page again.
5. Delete the QA job with the trash icon.

Expected: Verified jobs appear publicly with a **Verified** badge. Rejected jobs disappear from the public list. Delete removes the job. Only change jobs you created.

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

ADM-06 — Applications: status, note, CV

> Complete the cross-role flow in section 9 first.

1. Open **Applications**.
2. Change the QA application's status to **Shortlisted**.
3. Click **Note** and read the cover note.
4. Click the CV filename.
5. Close the new tab.

Expected: The status changes. The note matches what the worker typed. The CV opens in a new tab through a short-lived link. Do not delete real applications.

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

ADM-07 — Delete a QA application

1. On **Applications**, click the trash icon for the QA application you created.

Expected: The application disappears from the admin panel and from the worker dashboard after a reload. Only delete applications you created during this test.

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

ADM-08 — Saved searches

1. In a signed-out window, save a job alert on **/jobs** using a **QA email**.
2. In the admin panel, open **Saved searches**.

Expected: The QA email and its filters appear. Delete only the QA search.

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

ADM-09 — Enquiries

1. Submit the homepage contact form with a **QA name and QA email**.
2. In the admin panel, open **Enquiries**.
3. Change the status to **In progress**, then **Handled**.
4. Click **Reply** (it should open your email client).
5. Delete the QA enquiry.

Expected: The enquiry appears with name, email, phone, company, city and message. Status changes save. Reply opens a mail client. Delete removes it.

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

ADM-10 — Admin access is enforced

1. In the worker window, open **/admin**.
2. In the employer window, open **/admin**.

Expected: Both show **"Not authorized"** and no admin data. Only the admin account can use the admin panel.

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

---

9. End-to-end cross-role flow (most important test)

Use all three windows. Create every record with a `QA-` prefix so it can be cleaned up.

1. **Employer** posts a job: `QA – Cross Role Electrician`.
    - Expected: **Pending review** in My Jobs; not public.
2. **Admin** → Jobs → **Verify** the QA job.
    - Expected: status **Verified**.
3. **Worker** opens **/jobs** and searches for the QA job.
    - Expected: the job is public with a **Verified** badge.
4. **Worker** applies, entering a phone number, attaching the dummy PDF and a cover note.
    - Expected: **Application submitted**; the application appears in the worker dashboard as **Submitted**.
5. **Employer** → Applications.
    - Expected: the worker's application appears with the cover note.
6. **Employer** clicks **Shortlist**.
    - Expected: status becomes **Shortlist**.
7. **Worker** reloads **Application status**.
    - Expected: the status shows **Shortlist/Shortlisted**.
8. **Admin** opens Applications.
    - Expected: the same application and updated status are visible.
9. **Admin** changes the status to **Hired**.
    - Expected: worker sees **Hired** after a reload.
10. **Admin** deletes the QA application, then deletes the QA job.
    - Expected: the application disappears from the worker dashboard; the job disappears from `/jobs`.

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

---

10. Responsive and accessibility checks

RES-01 — No horizontal scrolling

1. At 390 px width, open the homepage, /jobs, /login, /licences and a legal page.

Expected: No sideways scrolling and no content cut off. Buttons remain usable.

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

RES-02 — Forms on mobile

1. At 390 px, fill in the sign-up, contact and apply forms.

Expected: Every field and button is reachable; the on-screen keyboard does not hide the submit button; errors are visible.

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

RES-03 — Keyboard and Escape

1. Use Tab to move through the header, forms and modals.
2. Open a job modal, the mobile menu and a licence modal; press Escape on each.

Expected: Focus is visible, focus does not get trapped outside an open modal, and Escape closes it and returns focus sensibly.

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

RES-04 — Reduced motion / zoom

1. Set browser zoom to 200%.
2. If available, enable “reduce motion” in the operating system.

Expected: Content remains readable and usable. The hero carousel and globe do not prevent use; animations are reduced or static.

Result: ☐ Pass ☐ Fail ☐ Blocked
Notes: _____

---

11. Privacy and permission checks

ID	Test	Expected	Result
SEC-01	Worker opens `/admin`	"Not authorized", no data	☐ Pass ☐ Fail ☐ Blocked
SEC-02	Employer opens `/admin`	"Not authorized", no data	☐ Pass ☐ Fail ☐ Blocked
SEC-03	Employer looks at Applications	Only applications to that employer's own jobs	☐ Pass ☐ Fail ☐ Blocked
SEC-04	Worker looks at Applications	Only that worker's own applications	☐ Pass ☐ Fail ☐ Blocked
SEC-05	Signed-out visitor opens `/dashboard/worker`	Sign-in prompt, no personal data	☐ Pass ☐ Fail ☐ Blocked
SEC-06	Signed-out visitor opens `/dashboard/employer`	Sign-in prompt, no company data	☐ Pass ☐ Fail ☐ Blocked
SEC-07	Admin opens a CV	New tab with the CV; the link is not a permanent public URL	☐ Pass ☐ Fail ☐ Blocked
SEC-08	A second worker/employer account (optional)	Cannot see the QA worker's application or documents	☐ Pass ☐ Fail ☐ Blocked

Notes: _____

12. Clean-up after testing

The tester cannot delete accounts. Clean up through the website where possible, and send the remaining list to GoldenGlow.

- [ ] Delete every **QA job** you created (Admin → Jobs → trash).
- [ ] Delete every **QA application** you created (Admin → Applications → trash).
- [ ] Delete every **QA saved search** (Admin → Saved searches → trash).
- [ ] Delete every **QA enquiry** (Admin → Enquiries → trash).
- [ ] Remove any test files or screenshots containing credentials from your device.
- [ ] Send GoldenGlow the email addresses of any accounts you registered so they can be removed:

```
Worker account:   _____________________________
Employer account: _____________________________
Admin account:    _____________________________  (supplied by GoldenGlow)
```

Do **not** delete demo jobs, existing applications or enquiries that are not prefixed `QA-`.

---

13. Final summary and sign-off

Section	Total cases	Pass	Fail	Blocked
Public website	15			
Worker	10			
Employer	9			
Admin	10			
Cross-role flow	1			
Responsive / accessibility	4			
Privacy / permissions	8			
Total	**57**			

Overall result: ☐ Ready to launch ☐ Ready with minor issues ☐ Not ready

Open critical/high issues:

```
1.
2.
3.
```

Tester name: _____
Date: _____
Signature: _____
